To Whom It May Concern:

We considered several different VFFS machines when we made the decision to expand our production capabilities. We looked for a machine that was fast, simple, well built, easy to maintain, and offered the best value. After careful consideration that machine was the Viking from Leonhard Packaging.

The machine has preformed flawlessly since installation and is capable of out performing the specs that Leonhard Packaging had guaranteed. It is simple to use, easy to maintain, and has allowed us to increase our production expectations even on small runs. Their response and follow up to any issues or questions has been unsurpassed.

When we replace or add additional machines in the future they will be from Leonhard Packaging.

Regards,
