

To whom it may concern:

July 31st 2008

Wada Farms considered several different vertical bagger manufacturers; however, after careful consideration we settled on two Viking baggers from LPS. We looked for a design that was simple, extremely rugged, and easy to maintain. That was the Viking baggers! We knew that running potatoes required an extremely rugged build and the Viking was up to the task.

The feedback and support from LPS was thorough and helpful. The baggers are running very well and we are happy with our decision to choose the Viking machines from LPS. We would recommend the Viking baggers from LPS as they are more rugged than other builds and a great value.

Regards

A handwritten signature in blue ink that reads "Kip Yeates". The signature is fluid and cursive, with a long horizontal stroke extending to the right.
